TS007 3 Star Euro Cylinder

Protect your home with maximum security...

The Schlosser 3* Diamond Rated Cylinder

The Schlosser Cylinder provides the maximum level of lock security, offering unparalleled protection against all methods of lock attack.

Accredited with the prestigious British Kitemark, TS007 3 Star, Secured By Design and Sold Secure Diamond Standard, the Schlosser Cylinder has been rigorously tested to withstand all known methods of attack including lock snapping, bumping, picking, drilling and manipulation.

Why Do I Need To Upgrade My Locks?

! A burglary takes place every 40 seconds in the UK!

! 70% of burglars enter via a door!

! 25% of burglars use lock snapping!

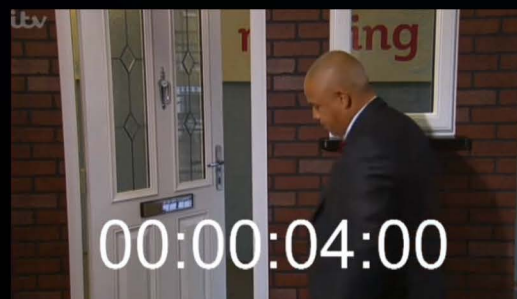

What Is Lock Snapping?

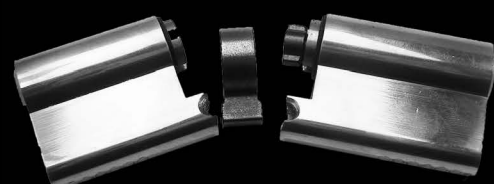

Lock snapping is a very common method used by burglars to break into a property. The euro cylinder can be snapped in half exposing the locking mechanism in a matter of seconds.

Whilst you may believe the multi-locking points on your door make it secure, it's important to realise they are all operated by the cylinder – this is the weakest point and if compromised all the locking points are rendered useless.

TV shows including 'Crime Watch' and 'This Morning' have raised awareness of Lock Snapping with a live TV demonstration where a former burglar gains access through a door in just 4 seconds using Lock Snapping.

this morning CRIMEWATCH

How Can I Protect My Home From Lock Snapping?

Basic Cylinder Without Snap-Secure

The cylinder snaps in 2 halves leaving the locking mechanism completely exposed.

Burglars can get into your home in less than 10 seconds!

X THE PROBLEM

Schlosser 3* Cylinder With Snap-Secure

The cylinder has 2 sacrificial sections which snap off in the event of an attack. The advanced trap pin system then activates fully securing your door. **Burglars are locked out!**

✓ THE SOLUTION

What Makes The Schlosser Cylinder So Secure?

Snap-Secure

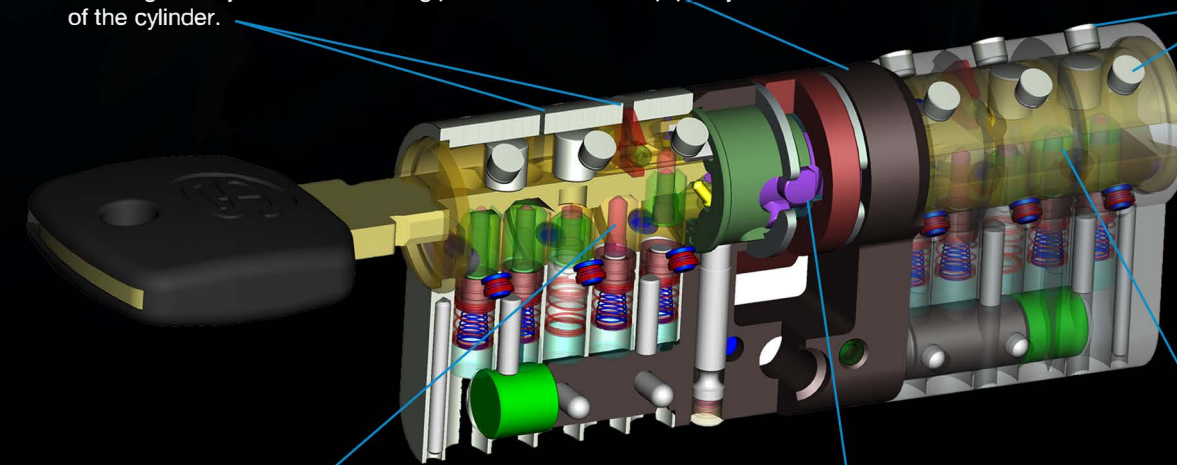

2 x sacrificial sections snap off when the cylinder is attacked deterring would be intruders. Access can still be gained by inserting the key into the remaining part of the cylinder.

Molybdenum Core

The Schlosser cylinder features a hardened Molybdenum centre section which offers optimal protection for the inner trap-pin system.

Anti-Drill

22 x hardened steel pins are reinforced with plates strategically positioned throughout the cylinder to completely protect your home against lock drilling.

Sold Secure Diamond Grade

Accredited with the exceptional Sold Secure Diamond Grade – the highest standard issued by the Master Locksmiths Association.

Anti-Pick

Advanced Anti-Pick pins guard against lock picking attacks ensuring your home is safe and secure.

Patented Trap Pin System

During an attack the hardened molybdenum centre cam is completely locked by the patented 12 x trap pin system. Your door will be secured and can still be opened and closed from the inside using the key.

Anti-Bump

The non-responsive Anti-Bump pin resists all lock bumping attacks.

What is Secured By Design?

Secured By Design is awarded to companies producing security products that pass standards and tests nominated by the Police service. The standards and related tests must demonstrate the product effectiveness in preventing or reducing crime, usually by resistance to physical attack.

What is Sold Secure Diamond Grade?

Sold Secure, a testing body owned by the Master Locksmiths Association has produced a high level test specification for cylinder locks (SS 312 Diamond). The test addresses all current techniques used by criminals.

What is TS007 3 Star Kitemark?

Secured By Design, The DHF and Glass & Glazing Federation have together launched TS007, a performance standard aimed at giving guidance for homeowners looking to replace existing cylinder locks on doors. TS007 is aimed at protecting cylinder locks against all known methods of forced entry, including picking, manipulation, bumping and snapping. Our 3* Cylinder has been accredited with TS007 3 Star Kitemark.

What is BS EN 1303:2005?

BS EN 1303:2005 is the European Standard which establishes assessment and test criteria for a cylinder to quantify its resistance to physical attack, durability and key security. The Schlosser 3* Cylinder conforms to BS EN 1303:2005.

5 Keys As Standard

The Schlosser Technik 3* is one of the only 3 Star Cylinders to come with 5 keys as standard, offering exceptional value for money. Extra keys for 3 Star Cylinders are typically priced £7-8 per key. Should you need any additional keys, you can order them via your local certified locksmith or online by providing your key card code.
